To: Oregon City Mayor Alice Norris,

Oregonians want to experiment with Instant Runoff Voting in local elections (see attached poll results).
Oregon's Constitution makes allowances for Instant Runoff Voting (Article II Section 16).

However, Oregon's Elections Code creates barriers that put local governments at potential risk of violating the Code if they implement this voting method. So far, no local jurisdiction has been willing to run the risk of challenging Oregon election laws.

Senate Bill 29 amends the Code to eliminate these barriers to implementation. If passed, it would allow cities, counties and special service districts the local option to choose their preferred voting method.

We the undersigned ask you to contact the Senate and House Rules Committees to urge passage of SB 29.
